

ANF II

RELEASE NOTE

Operational system: WinXP/2003/2008/Vista/Win7/Linux

Date: 13.08.2012

Firmware version: 2.1.49

New capabilities:

- S/PDIF support
- MP3 format support
- Improved overall system performance
- Improved harmonic reject filter
- Improved low-frequency noise filter
- Suppression of broadband filter raised to 30 dB
- Ability to simultaneously synchronize the date and time via web interface
- Ability to upload up to 500 MB files via web interface
- Continuation of the recording after power transient fault

Use restrictions:

MP3 files can be played via web interface at the sampling rate of 44,100 Hz only.

The sampling frequency of the signal transmitted to S/PDIF input should match the frequency set in ANF II, otherwise the playback speed may appear altered.
